

Open Raising Ranges

EP 12% Open Raising Range

On the felt adjustments:

Remove the weakest pp's (22-55) and smallest sc's (76s-98s) if your opponents are 3betting you relentlessly. Add the other suited Aces, suited broadways and KQo if your opponents are not fighting back.

BTN 31% Open Raising Range

On the felt adjustments:

Remove the weakest non-pair and non-Ace hands if the blinds love to 3bet restale vs our open raises. You can keep them in, just be prepared to either fold a lot or call and play in position in the 3bet pot. Add the remaining off-suit broadways, suited Queens and connectors down to Q2s, 54s, 64s and 96s. You can even go as wide as opening any two cards (ATC) if the blinds just never fight back.

CO 20% Open Raising Range

On the felt adjustments:

Remove the weakest suited hands (65s-87s and 97s-99s) if we're faced with a BTN and blinds that just don't give up. Opening with these weaker hands are bluffs meant to give us more steal opportunities. Add the remaining off-suit Aces, off-suit broadways, good suited Kings/Queens and more suited gappers if your opponents are push-overs.

Raising Over Limpers from the Blinds (7%)

On the felt adjustments:

Remove the weakest hands (99, KJs, AJ) if your limping opponents are likely to call and love to use position and aggression post-flop to bully you. Widen the range if the limpers are likely to fold. Also, widen your range if they call a lot and give up easily on the flop. This is an easy way to pickup a bloated pre-flop pot on the flop.
